Evidence in Action

Regional Educational Laboratory (REL) Toolkits

Toolkits provide professional development materials and resources to help educators implement evidence-based instructional practices in their schools. For instructors, toolkits provide a guided learning experience for use by professional learning communities or individual teachers learning on their own. For school leaders, toolkits offer resources to support scaling and implementation of the practices.

Each toolkit helps educators implement practices recommended by one of the U.S. Department of Education's [What Works Clearinghouse practice guides](#). Educators can select from toolkits focused on mathematics, writing, reading, and using technology, from prekindergarten through the postsecondary level.

Algebra instruction in middle and high school	—	Using technology to support postsecondary student learning	+
Fractions instruction in grade 6	+	Teaching math to young children	+
Writing instruction in grades 2-4	+	Assisting students struggling with mathematics in grades 3-6	+
Writing instruction in the middle grades	+	Differentiating reading instruction in grades K-3	+
